Summary

Motivated BCA graduate with hands-on experience in **Python**, **Machine Learning**, and **AI application development**. Skilled in building intelligent solutions using **FastAPI**, **Django**, **Scikit-Learn**, **TensorFlow**, **Pandas**, and **NumPy**. Developed projects including an **AI-powered recruitment platform**, a **voice assistant**, and an **ML experiment orchestration tool**, demonstrating strong **problem-solving** and **software development** abilities. Seeking an **AI/ML Engineer** or **Python Developer** role where I can apply my technical skills, contribute to **real-world AI projects**, and continue learning emerging technologies.

Technical Skills

- **Languages:** Python, C, C++
- **Frameworks:** FastAPI, Streamlit
- **Libraries:** NumPy, Pandas, Matplotlib, Scikit-learn, TensorFlow
- **Databases:** MySQL, MongoDB
- **ML & Data:** Data Preprocessing, EDA, Feature Engineering, Regression, Classification, NLP, Model Evaluation
- **Tools:** Git, GitHub, VS Code, Kaggle, APIs
- **Web:** HTML, CSS

Experience

ASB Academy

Jan 2026 – Present

AI/ML Trainee

- Developed and evaluated Machine Learning and Deep Learning models using Python, Scikit-Learn, and TensorFlow for real-world AI applications.
- Performed data preprocessing, feature engineering, exploratory data analysis (EDA), and visualization using Pandas, NumPy, and Matplotlib.
- Built, trained, tested, and optimized predictive models through hyperparameter tuning and performance evaluation techniques.
- Worked on NLP and Transformer-based solutions, gaining hands-on experience with text processing, model fine-tuning, and AI-driven applications.
- Collaborated on end-to-end AI/ML projects and integrated models into backend applications using FastAPI while following industry-standard development workflows.

Projects

HireMind – AI Recruitment and Mock Interview Platform | [Live Demo](#)

- Developed an AI-powered recruitment platform for resume analysis and mock interviews using Python and FastAPI.
- Implemented resume scoring and personalized improvement suggestions.
- Designed candidate evaluation workflows for automated assessment and feedback generation.
- Built and deployed the application using AI/ML concepts and modern web technologies.

Referro — AI-Powered Job Application Outreach Platform | [Live Demo](#)

- Architected Referro, a full-stack AI job-outreach platform (Django REST Framework, React, PostgreSQL) that drafts tailored recruiter emails from job descriptions.
- Built JD-to-email pipeline with automatic recruiter email extraction from pasted or uploaded (PDF/DOCX) job descriptions.
- Integrated Gmail/Outlook OAuth for sending outreach emails and threaded reply tracking via Celery-based async polling.
- Designed a two-sided job board enabling users to post referral jobs with AI-assisted JD generation.
- Implemented secure authentication with JWT and 6-digit email verification, plus auto resume-attachment on outgoing emails.

Nova – AI Voice Assistant

- Developed an AI-powered voice assistant using Python, speech recognition, and text-to-speech technologies.
- Implemented voice commands for web browsing, application launching, and music playback.
- Integrated intelligent response generation and command processing features.
- Focused on automation, productivity enhancement, and user-friendly interaction.

Education

SGGS College, Sector 26, Chandigarh

2023 – 2026

Bachelor of Computer Applications (BCA)

Govt. Model Senior Secondary School, Sector 10, Chandigarh

2021 – 2023

Senior Secondary Education
